

TAP CHANGER TYPE MHF II

Specification, Assembly and Materials

Descriptions	Remarks
General Specifications	- available in one, two or three phase applications - multi layer types upon request - shaft length available in variable sizes - connection diagrams (page MHFII 7) can be applied in any variation to all types - bolted onto the supports - welded under transformer cover and allow strong construction

Materials

Steel Parts	- available in stainless or mild steel - mild steel parts are cadmium or zinc plated	galvanizing upon request
Aluminium Parts	GAISI2(Cu)	
Brass Parts	CuZn40Pb2(CW617N) / F34 DIN T7 673	
Copper Parts	E - Cu F25 DIN 40500	
Insulator Parts	Paper phenol - plastic resin based laminates, HP 2061.5 class of DIN 7735	
Upon Request	- the aluminum parts can be protected by anodic oxidation - the mild steel parts can be supplied in stainless steel - the brass and copper parts can be tin, silver or cadmium plated	
Current	up to 400 A	
Voltage Class	B.I.L (other B. I. L. values are available upon customer request)	
20 kV / 30 kV / 60 kV	125 kV / 170 kV / 325 kV	

Operating Instructions

For each operation, the handle must first be pulled axially in the direction of the user in order to be subsequently rotated to the desired position. After being turned, the handle drops into the intended position by means of a high tension spring. Each position is precisely marked by a notch. This process is clearly marked on control knob as; „**LIFT - TURN - SWITCH ON** „ (can be engraved in any language)

Control Devices Incorporating a Handle /Unlocking by Axial Displacement of the Control Shaft

MH 345A

(Standard for axis-diameter 14 mm)

MH 345B

(Padlockable Model for axis-diameter 14 mm)

MH 346A

(Standard for axis-diameter 20 mm)

MH 346B

(Padlockable Model for axis-diameter 20 mm)

*the hole on the shaft is drilled at parallel position with respect to the middle position of the tap changer

Hand wheel-operated Control Devices (MH 349 /350) and with Protective Cover (MH 347 /348)

MH 347

(with Padlockable Protective Cover/
axis-diameter 14 mm)

MH 348

(with Padlockable Protective Cover
/axis-diameter 20 mm)

MH 349

(unlocking by padlockable pull knob / for axis-diameter 20 mm)

Ø 180

MH 350

(unlocking by axial displacement of the control shaft
/for axis-diameter 14 mm)

Ø 180

*the hole on the shaft is drilled at parallel position with respect to the middle position of the tap changer

Fixed Contacts

Flag type contacts

Tubular contacts

Fixed contact adapter for cable connection

(Optional for contact No : MH 374)

Unless otherwise specified by the customer, flag type contacts are positioned as in the diagram above. The contact situated near the operating device is facing downwards.

MH 371

Common contact with straight flat shape

	Contact Numbers	Ø J	Ø K	I	H
150 A / Tubular Contact	MH 365	7	14	20	37
220 A / Tubular Contact	MH 366	8,5	14	20	37
150 A / Tubular Contact	MH 367	9,5	13,5	30	56
220 A / Tubular Contact	MH 368	13,5	17,4	30	56
315 A / Tubular Contact	MH 369	15,2	20	30	56
315 A / Tubular Contact (optional)	MH 372	M12	20	30	56
400 A / Flag Type	MH 370	-	30 x 30 x 5		51

Handle Directions

Repeaters for rack and pinion operating

No. MD 352

No. MD 354

No. MD 353

Numbering for repeaters for rack and pinion operating

A1

B1

C1

D1

Numbering Combinations

- all horizontal MHF II tap changers of the reinforced serie can be paired by superimposing several tap changers
- built steel brackets are assembled by nuts and bolts
- depending on which system is adopted, the user can:
 - either operate the tap changers with one shaft
 - or operate part of the tap changers with one shaft, and the other part with a second shaft
- the position of the coupling shaft and the position of the setting shaft has to be specified

Note: It is essential, when ordering, to quote dimension „W“ the minimum value of which to be set in each case depends on the insulation conditions and on the position of the different tap changers

Numbering Combinations

Setting for delta transformer

Setting for star transformer

Setting for star with outer - earthed conductor transformer

Series - parallel coupling

Star - delta coupling

Typical combination:

- Stage, series - parallel coupling
- Stage, delta diagram - setting $\pm 2,5\%$

Common output per phase

Common output per phase

Opposite contacts

When ordering please quote

- 1 - Tap changer unit no.
 - 2 - The voltage class, current and type of setting or coupling
 - 3 - The number of the fixed contacts
 - 4 - Control device no. (MH 341 / MH 342 / MH 353)
 - 5 - The language on the control device (page 1)
 - 6 - Number of positions
 - 7 - The indication of the repeater disc (A1, B1, C1, D1)
 - 8 - Dimensions of the fixed contacts ($\emptyset$ J and $\emptyset$ K)
 - 9 - L, e, X, W dimensions from the tables ($\emptyset$ / b / a / d) for hanger
- For special setups not shown in the catalogue please contact us*
